5

Available in:  
04

- According with the European standard EN ISO 20347:2022 (04+CI+SR)

- Extra thermal insulation down to -30°C/ -22°F

- Easy to clean;

- Removable insole for extra comfort;

- Hydrolysis resistant.

Sole resistant to oils, fats, acids and organic solvents

Slip-resistant and antistatic sole

Steel toecap protection at an impact of 200J and compression resistance under maximum load of 15kN

Steel midsole with drilling protection of 1100N

Textile lining

Easy pull-on

Easy pull-off

Energy absorbing heel

Excellent grip on the most slippery surfaces

### YOUR FEET IN TECHNOLOGY

The Dikamar<sup>®</sup> team has been working for the last 20 years to give you the best polyurethane boots for your work. Our aim is for you to feel comfortable and safe, wherever you are, whenever you need.

Combined with the highest technology, at Dikamar<sup>®</sup> we only work with top quality materials, for the sole purpose of providing you with the best boots for your activity.

Thanks to all our efforts, we were able to develop the best mix of materials, as well as the best mixing process, so that you can feel your feet in action all day long.

### CLEANING INSTRUCTIONS

Cleaning can be done by washing your wellington, after each use, with a soft brush and mild detergent. Rinse away the remains of the detergent with water and allow the boot to dry at room temperature and in the shade. Store in a well-ventilated and dry place.

Regular cleaning and replacement of the insole, when used, is also important to prevent the proliferation of bacteria. Careful and regular cleaning increases the durability of your wellingtons. When replacing the insole you must ensure that you are using an insole just like the original.
