- Kevlar midsole with drilling protection of 1100N;
- Resistant to water absorption and penetration;
- Resistant to oils, fats and chemicals.

Cleaning Instructions

Clean your footwear regularly with suitable products. Do not use caustic or corrosive cleaning agents. Dry the footwear at room temperature and in the shade after each cleaning. The use of heat sources to accelerate the drying of footwear can damage the flexibility and the quality of the materials.
Footwear should be properly stored in a cool and dry place. Regular cleaning and replacement of the insole, when used, is also important to prevent the proliferation of bacteria. When replacing the insole you must ensure that you are using an insole just like the original.
